## SKILLS

- React
- MongoDB
- Expressjs
- Javascript
- SCSS
- Git
- Figma
- Insomnia

## LANGUAGES

- English | Elementary
- Spanish | Native

## OBJECTIVE

I am a self-taught junior web developer with knowledge of the MERN stack (MongoDB, Express, React, Node.js). Passionate about creating modern and scalable web applications, I have experience in personal projects and development practices. I am seeking a role where I can apply and enhance my skills in a professional environment.

## EXPERIENCE

### MANAGER

**Centro Automotriz y Repuesto Gonzalez Rosario, S.R.L..**  
| Mar 2017 - Present

- Inventory Management: Ensured that stock is always available and organized for quick access and availability of products.
- Customer Service: Guided clients in finding the right spare parts for their needs.
- Supplier Coordination: Managed supplier relationships to maintain optimal supply and place orders.
- Process Optimization: Implemented organization systems to streamline dispatch and reduce search times, improving operational efficiency.

## EDUCATION

**O&M.** | 2017 - Jan 2020

Not Completed

### SELF-TAUGHT | FULL-STACK WEB DEVELOPMENT

| Feb 2022 - Present

## PROJECTS

### Personal Web Portfolio

Developed a personal web portfolio using React.js, SCSS Modules, and Vite. This portfolio is designed to offer clear navigation and a responsive design that adapts to any device.

In my portfolio, you will find:

Main Projects: Full-stack applications where I apply the MERN stack and other modern technologies.

Mini-projects: Practical exercises demonstrating skills in programming logic, API integration, and interface optimization.

I invite you to visit the Projects section in my portfolio (the link is in the Contact Information section) to learn more about my work.
